Circulation Breakdown

Readers include all members of the Canadian Dermatology Association, Canadian Dermatology Residents, and those with an interest in dermatology.

*Average circulation per issue

Description

Molecular Imaging is dedicated to publication of studies that combine recent advances in noninvasive imaging modalities with molecular and cellular biology in order to improve our understanding of normal and disease processes. This serves both the scientific and clinical communities by disseminating novel results and concepts relevant to the biological study of normal and disease processes in both basic and translational studies ranging from mice to humans.
